

RAJI FAROUQ ADEWUNMI

Web / Software Developer

Lagos, Nigeria | rfarouq69@gmail.com | +234 807 949 7100

PROFILE

Web and software developer with experience across the MERN stack and Python. Has built projects involving AI agents and retrieval based systems, including a production legal information platform. Also has a background in visual design, contributing to interfaces that are clean and user friendly.

SELECTED PROJECTS

Legally Unbullied (AI / Legal Tech, 2026)

AI powered legal information platform for Nigeria. A retrieval and drafting agent (built on Groq) answers questions over an indexed corpus of the approximately 550 act "2004 Laws of Nigeria" federal compendium, citing only sourced provisions and referring users to the NBA Find a Lawyer directory when a matter requires a licensed professional.

Groq, Retrieval augmented generation, Agent orchestration

Nearspace (Full Stack / PWA, 2026)

Proximity first professional network for technology creators in Nigeria, featuring a live map, local feed, bounties, and groups. Built as an installable, offline first progressive web app with geohash based proximity search and integrated payments.

React, Vite, Firebase (Firestore, Realtime DB, Auth), Leaflet, Paystack, Vercel

ForgeAI (Mobile / On Device AI)

Local first AI coding assistant for Android, running on device GGUF model inference via llama.cpp, bridged to a Capacitor app through JNI. Includes token streaming, a checksummed model catalog, workspace file management, and an automated test suite for the agent core.

JavaScript, Capacitor, llama.cpp, JNI, Vite

Chan Watchparty (Realtime Systems)

Synchronized watch party application with a custom Node.js sync server and a Cloudflare Workers proxy for video streams, plus a native Android build with a native media player fallback for broader format support.

Node.js, Capacitor, WebRTC / LiveKit, Docker

Stare (Computer Vision)

Real time, browser based staring competition app that uses face mesh tracking to score eye aspect ratio and head pose as an impartial referee, with WebRTC matchmaking between players.

Next.js, TypeScript, MediaPipe, WebRTC, Firebase, Tailwind

EXPERIENCE

Full Stack Web Developer 2020 to Present

- Built responsive web applications using the MERN stack (MongoDB, Express, React, Node.js).
- Developed Python based back end services and scripts for client and personal projects.
- Integrated Firebase for real time data storage and user authentication.
- Designed and implemented UI/UX with a focus on clean, user friendly interfaces.

Freelance Graphic Designer 2022 to Present

- Designed thumbnails and promotional graphics for a sports YouTube creator and influencer.
- Delivered consistent visual branding across social media channels, supporting audience growth.
- Managed the end to end creative workflow, from brief through to final deliverable.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML/CSS

AI: Built projects using agentic AI and retrieval based systems (see projects above)

Backend & Cloud: Node.js, Express, FastAPI, SQLite, Firebase, Cloudflare Workers, Docker

Mobile: Android, Capacitor, Gradle, JNI/NDK

Frontend: React, Next.js, Vite, Tailwind CSS, Framer Motion

Design: UI/UX design, design systems, Adobe Photoshop, Illustrator, Blender, CorelDRAW

EDUCATION

B.Sc. Computer Science (in progress) 2023 to Present

Tai Solarin University of Education, Nigeria

Senior Secondary Certificate Examination (SSCE), Nigeria
